“Home Grown Mission Statement”

Home Grown supplies and creates corrective medical devices such as penile prosthetics & STP (stand to pee) devices that caters for men.

We also supply binders, harnesses & able to create custom prosthetics for most individual needs.

Home Grown supplies this service and products at cost as a community incentive. The aim is to provide a service that helps with maintaining the health and well being of community members but also educates about the myths and stereotypes that casts shadow over these products.
